NRT CONSULTANCY SERVICES PVT. LTD, Ranchi

08/2021 - Present
Use Java/J2EE technologies to develop web application for client server environment and add functionalities to existing applications.

CERTIFICATES

Udemy Certified React Developer by Andrei Neagoie and Yihua Zhang
(07/2021 - 11/2021)

PERSONAL PROJECTS

REACT WEATHER APP
- Find the Temperature of any world of City including humidity, wind speed, Pressure and sunrise. An API and topics like async await, hooks, state helped me to create this project.
- Weather App (ecstatic-mclean-431fab.netlify.app)
- Github Link:- coderSatya/weatherapp (github.com)

REACT COVID19 TRACKER
- With the help of Line chart and Bar chart you can find the total number of Confirmed, Recovered and Deaths in global as well as any part of Country. I also used Material UI.
- Github Link:- coderSatya/corotracksystem (github.com)

CRUD OPERATION USING REACT & REDUX
- Performed CRUD operation using React & Redux where we can Create, Read, Update and Delete. Also Used Material UI & dummy JSON data to perform operations.
- Github Link:- coderSatya/create-redux-operation (github.com)

REACT ADVICE APP
- It is my first React project, here we are just getting an advice as soon as we click on get advice button from the given api.
- React App (codersatya.github.io)
- Github Link:- coderSatya/adviceapp (github.com)

SCORE KEEPER GAME
- With the help of Dom manipulation and EventListener I was able to make a ping pong ScoreKeeper game where you can either Increment ,Decrement and reset the values.
- ScoreKeeper Game (codersatya.github.io)
- Github Link:- coderSatya/ScoreKeeperGame (github.com)

UNIVERSITY WEBSITE
- Made a fully responsive website where students can enroll their data and find their courses. Sections like Home, Services included in this website & google map in the Contact section.
- University Website Design (codersatya.github.io)
- Github Link:- coderSatya/University-Website (github.com)
